

### **HF Chlor-Alkali LLC**

HF Chlor-Alkali, LLC (HFC) located in Eddyville, Iowa is a Midwest distributing plant that manufactures industrial caustic soda, hydrochloric acid, and bleach for local processing plants. HF Chlor-Alkali, LLC offers flexible shipping and transportation options along with extensive technical service and support. As an affiliate of Harris & Ford, LLC, HFC's goal is to provide the highest quality chemical products in the industry.

### **Currently Hiring**

HF Chlor-Alkali, LLC is currently accepting applications for **Operation Technicians** at the Eddyville, Iowa location currently under construction. These jobs require a high level of responsibility and accountability. We are looking for long-term, self motivated individuals with demonstrated critical thinking and professional skills to join and work as a team on a 12-hour rotating shift crew to ensure successful operation of our processing plant. Shift schedules include weekends, holidays, and overtime as required.

### **Operation Technician**

Responsibilities for each crew include and are not limited to:

- Monitor the process at all times during scheduled shift
- Be the point of contact for safety, environmental, emergencies, plant operations, maintenance, logistical coordination, and any other needs that may arise
- Load and unload product and raw materials as necessary
- Sample and test various process streams as required
- Make necessary decisions and adjustments to the process as dictated by operational parameters
- Maintain satisfactory plant sanitation and housekeeping
- Troubleshoot, resolve, and report issues as they arise
- Other Responsibilities include and are not limited to:
  - Operate safely, environmentally friendly, and efficiently
  - Care for equipment and other plant assets
  - Make necessary quantity and quality products required by the business plan
  - Willing participation in an on call and rotating shift schedule
- Additional tasks and duties as assigned and/or required

### **Qualifications:**

High School Graduate/Diploma

Must be dependable, have strong work ethics, possess the ability to pay close attention to detail, and work safely, efficiently, and productively in a team environment of a chemical process that operates continuously 24/7/365.
